

GoTab Pass, our radio-frequency identification (RFID) solution, is ideal for operators at multi-unit or single-unit restaurants, food halls, hotels, resorts, festivals, and other entertainment venues. It provides a quick and easy commerce experience for guests and operators alike.

With a simple tap of a branded RFID card or wristband, the GoTab Pass allows guests to charge items back to a single tab whether it's a beer wall, a multi-unit food hall with multiple vendors, or hotels and resorts. This is all done seamlessly from the GoTab POS, once the pass is registered, your guests are ready to transact.

Increased Convenience

Directly retrieve tabs via the GoTab POS and handheld terminal.

Simplify Ordering

Add multiple passes to a single tab and streamline orders with text notifications for orders placed and/or ready.

Improved Guest Experience

Guests can use self-serve stations, allowing them to take control and manage their own experience.

A Digital Journey with a Richer Guest Experience

The GoTab Pass creates a streamlined ordering and payment experience for guests while driving increased transactions and operational efficiencies for vendors.

Sync Multiple Guests To a Tab

Visiting with friends or family? If there are multiple guests in a party, each guest can receive a Pass under one tab linked to one credit or debit card. In the case of large events, pre-load a certain amount onto the Pass, as an alternative to drink tickets.

Real-Time Tab Visibility

Once a GoTab Pass is scanned at a location, operators have visibility into everyone in the party under that tab and their orders.

Seamless To Close Out

No more waiting in line, tabs automatically close at the end of the night. Guests are prompted to return passes to servers before leaving. Once the passes are returned, servers have the ability to scan the card, pull up the tab, and add gratuity before closing out.

NO LOCK IN CONTRACTS

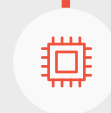

Data

It's yours

Hardware

Run on a tablet, pc, phone, it's up to you; our software runs seamlessly on iOS, Windows and Android platforms

Payment Processor

No one-size-fits all solutions here

Just let us know when you're ready and we'll be there to help you set up.
