

Simplify Inventory Management & Streamline Operations

GoTab's Restaurant Commerce Platform (RCP) now integrates with Yellow Dog, a full back-office inventory management solution, to offer efficient controls and systems to bars, restaurants, venues, and stadiums. Through the integration of GoTab and Yellow Dog, product data is seamlessly mapped to the operators' dashboard within the Yellow Dog platform. Real-time sales data from GoTab is continually tracked in Yellow Dog, empowering operators to make informed decisions regarding replenishment needs. As a result, managing inventory is no longer a burden.

KEY ELEMENTS:

- Yellow Dog pulls location & sales data from GoTab's API
- GoTab locations will automatically be assigned to stores in Yellow Dog
- Information synced in real-time

HOW YELLOW DOG SOFTWARE WORKS:

- Menu items and recipes are mapped to the POS item sold using Yellow Dog's POS item Mapping
- Sales can be matched to Yellow Dog Items based on SKUs
