GoTab EasyTab

Introducing EasyTab, the tab that goes where your guest goes. The simpler way to introduce your guests to order, split and settle all on their own device.

EasyTab helps GoTab operators introduce contactless ordering to their guests, guiding them over the hurdle of using their mobile device to place their food and drink orders, bridging traditional service models with guest-led ordering.

Optimize Convenience for Guests
Make the dine-in ordering experience more convenient for servers and guests.

Relieve Staff Workload
Bridge traditional service, and unburden servers from transactional tasks.

Share Tabs Between Servers and Guests
Elegantly integrates with GoTab's All-in-One POS and Contactless Ordering & Payment.

GoTab EasyTab

Change the Way Technology Supports Restaurant Operations

EasyTab effectively solves the problems of increased demand, staffing shortages and resistance to new service models. The result is an elegant transition from traditional ordering through a server, to mobile ordering and payment, and back again. It's all about making it easy for guests to help themselves. Without spending time to create an account or upload payment information, guests can now order, re-order and pay, throughout their visit from anywhere in the venue. No need to wait for a physical check to split or settle the tab.

EasyTab Benefits:

- Increases revenue, reduces turn times.

- Tabs stay open no matter where guests venture.

- Guests access tabs and create account with fewer steps.

- Positive user experience, removing the friction of guest entering contact, payment and Captcha information.

- Servers always know where to locate guests to deliver the order, using KDS & integrated printers.

How EasyTab Works

OPEN A TAB
Through a server, a bartender, or a host.

ADD PAYMENT
Server or guest dips or swipes card & enter's guest mobile number.

SHARE A TAB
Guests receive a link to access via their phone.

ENJOY!
