# Easy Tab

A Single Tab—From Host Stand to Table

✔ While other POS systems make guests close their tab when they move from the bar to the table, GoTab tabs stay open no matter where guests venture.

✔ Start a tab at the POS and send it to the guests' phone. No muss, no fuss, no long card numbers to enter. The guest just verifies the last 4 digits of their card number. That's it.

✔ Guests can order at their convenience using their mobile device. Servers can still add to the tab. One check-out, one transaction. Easy peasy.
