

# Sync Inventory Levels, Track Brewery Data, and Accurately Calculate Your Cost of Goods Sold

Beer30 is brewery management software that provides a clear line of sight into a brewery's operations, empowering teams with the data necessary to optimize processes, improve quality, and ultimately be more efficient and profitable.

## THE GOTAB AND BEER30 ADVANTAGE

The integration of GoTab and Beer30 provides breweries with full visibility into their operations by seamlessly syncing front-of-house transactions in real-time. This allows operators to make data-driven decisions with up-to-date inventory and streamlined reporting. Automatic updates reduce errors in inventory management, ensuring accurate tracking for both retail and wholesale channels.

## WITH GOTAB AND BEER30, OPERATORS BENEFIT FROM:

### **Streamlined Inventory & Recipe**

**Management:** Manage inventory and recipes seamlessly, ensuring accurate tracking of raw materials, finished goods, and warehousing.

### **Comprehensive Production & Batch**

**Tracking:** Track production and batches with real-time reporting, including fermentation, scheduling, and task management, for full operational visibility.

### **Forecasting & Planning:**

Accurately forecast production and raw materials needs, helping operators stay ahead of demand and optimize operations.

### **Integrated Accounting & Sales Order Management:**

Sync with QuickBooks Online for easy accounting, while managing sales orders and tracking inventory effortlessly.
