

Losses due to walkouts and insufficient funds are a real problem for operators of every size. With GoTab's innovative approach to Insufficient Funds Protection you'll significantly reduce the number of failed charges, liberating your staff from the resulting operational headaches, lost tips and missed revenue.

Streamlined Operations

Minimize disruptions caused by walkouts and insufficient funds, allowing your staff to focus on delivering exceptional service.

Proactive Revenue Protection

Prevent revenue losses by ensuring that all open orders are secured with authorized funds throughout the guest's visit.

Fraud Prevention

Safeguard your business against potential fraudulent activities, providing you with peace of mind and financial security.

Real-Time, Continuous Authorizations

When a guest initiates an order with a credit card, GoTab performs an automatic authorization, locking the funds equivalent to the outstanding balance. Each time the guest places a new order, GoTab repeats the authorization process, ensuring that the funds for that specific order are securely reserved. This step-by-step approach guarantees that you collect the necessary funds before proceeding with order fulfillment.

Added Piece of Mind

Most operators already have procedures to reduce the risk of walk-outs and other forms of losses. GoTab's Insufficient Funds Protection is another tool to help mitigate the risk of losses due to insufficient funds and other card payment failures.

Order-Level Authorization

Each new guest order triggers an authorization for the associated charge, ensuring necessary funds are locked from being used for a different purchase.

By seamlessly integrating Insufficient Funds Protection within the GoTab Manager Dashboard, you'll experience a newfound level of operational efficiency. Your staff can concentrate on providing exceptional service while the system diligently safeguards your revenue.

NO LOCK IN!

Our platform is designed to enhance guest experiences and streamline operations, all while boosting your bottom line.

Data

It's yours

Hardware

Run on a tablet, pc, phone, it's up to you

Payment Processor

No one-size-fits all solutions here

Contracts

They're month-to-month so you have the freedom to choose

Just let us know when you're ready and we'll be there to help you set up.
