The GoTab KDS is a one-of-its-kind kitchen management tool that is purposebuilt to help your kitchen operation run more efficiently. Because it's designed to optimize the fulfillment of all your orders — whether from traditional dine-in via POS, on-premise mobile (QR, GoTab Pass RFID) orders, or even online and third party orders, our KDS helps you run a lean, profitable operation from front-of-house to back-of-house.

a modifier is out of stock, we

make it easy for staff to 86/

disable items or individual

modifiers in bulk or at the

individual item/product level.

with longer prep times displayed

earlier so everything hits the

pass at the right time.

and an item is delayed, GoTab's KDS allows you to set individual prep times for specific items; those delays get displayed as wait times on the guest-facing menu.

### Deliver Amazing Front of House Experiences

The GoTab KDS combines all orders into a unified view. So no matter where the order starts, your front-of-house gets a birds-eye view of all incoming orders. Kitchen managers and expeditors get to identify and address issues at the source, and follow up with guests to ensure the order is accurate, right from the start.

#### Full Back-of-House Visibility

You'll never lose a ticket again, and will have access to kitchen productivity reporting on the fly. Here's why: Your kitchen team gets to choose how they want to work. Want to run everything on touch screens? We can make it work. Want to run your kitchen off printed tickets? We can work that way too. It's all up to you.

#### **Keep Guests In-the-Know**

The key to guest satisfaction is setting the right expectations. The GoTab KDS enables two-way text communication, allowing you to notify guests of issues or delays or alerting them when their order is ready for pickup (if applicable).

#### **Rush or Delay**

View Ticket Timers with all products associated with their respective prep times. Product Delays communicate slow kitchen times during the shift to your guests – prep time is displayed right on the menu – so guests always know if there's extra time associated with their order.

#### In-App Support - No Bots Allowed

Have a question? Experiencing an issue? Our best-rated, restaurant-savvy customer support is ready and available via one tap in-app. Start chatting instantly with the GoTab team and get back to doing what you do best. Get help from real people 24×7.

## NO LOCK IN!

Our platform is designed to enhance guest experiences and streamline operations, all while boosting your bottom line.

 Data It's yours
 Hardware Run on a tablet, pc, phone, it's up to you
 Payment Processor No one-size-fits all solutions here
 Contracts They're month-to-

They're month-tomonth so you have the freedom to choose

Just let us know when you're ready and we'll be there to help you set up.
